

KanaPrest

Single Wall Corrugated HDPR Pipe

Applications

KanaPrest is a single wall corrugated pipe suitable for agricultural, culverts, parking lots, sports fields, interior and exterior foundation drainage, downspout, septic, landscape, golf courses, and other commercial applications.

Strength

KanaPrest pipe provides maximum strength to weight ratio. At 5% deflection Kanaprest has a higher deflection than ordinary HDPE pipe.

Lightweight

KanaPrest exceptionally lightweight allows it to be installed with minimal crews and equipment.

Flexibility

KanaPrest exceptional longitudinal flexibility offers a huge advantage when field curving is necessary allowing for a faster install.

Feature

Outstanding compressive strength and economical price make KanaPrest the pipe of choice.

Raw Materials

Kanaprest is manufactured with superior virgin resin meeting or exceeding the requirements of ASTM F405, ASTM 667, and AASHTO M252.

Pipe Dimensions

I.D., In. (mm)	O.D. , In. (mm)	Ft	Pipe Stiffness 5% deflection (p.s.i.)
3 (75)	3.3 (84.2)	20, 100, 250	134
4 (100)	4.4 (112.5)	20, 100, 250	92
6 (150)	6.6 (166.4)	20, 100, 250	72
8 (200)	8.6 (219.6)	20, 100, 250	53
